

A close-up photograph of a pink lotus flower in full bloom. The petals are a vibrant pink color, with some showing a lighter, almost white center. The flower's center is a bright yellow, with visible stamens. The flower is surrounded by large, green, heart-shaped leaves and a brown, woody stem. The background is dark and out of focus, suggesting a pond or a similar natural setting.

Outcome Harvesting Cambodia – May 2018

Looking for... outcomes

To find answers... Jeph, Suzanne, and Samnang worked with...

...a wonderful team

We talked with the NGO's 'Boundary Partners'

- Village Leaders
- Village Development Associations
- School Support Committees
- Community Development Associations
- Commune Councils

We listened for outcomes

Changes in:

- Behaviour
- Attitude
- Relationship
- Policy

5 evaluation questions:

1. Have the groups the NGO works with changed?
2. Is life better in communities?
3. What has the NGO done to help?
4. What happens if the NGO leaves?
5. How does the NGO support its own work?

The collected 'stories' were...

1. Transcribed from Khmer
 2. Excerpts uploaded to Dedoose
 3. Excerpts themed and coded against our evaluation questions
 4. 'Pink dolphins' - *wonderful and unexpected surprises*
 5. 'Red flags' - *warning signs, deep concern*
-

a new story emerges...

An extra question about new social dynamics and a changing world

Working life *outside* rural villages...

factories, construction work, cities, crossing national borders

Different dreams...

- From looking after children, cows, home gardens and rice fields... to working in garment and cement factories, driving trucks, and city construction
- Village life is changing – weddings, funerals, religious events, elderly raising children, finding laborers for family rice fields, new concrete houses, mortgages and debt

Acute diabetes – equitable outcomes for Māori
